AYESHA NAZ

MERN Stack Developer

ashimughal687@gmail.com | linkedin.com/in/ayesha-naz | github.com/aisha-abid | aishanaz.netlify.app

PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience building and deploying MERN stack web applications from scratch. Skilled in REST API development, JWT-based authentication, role-based access control, real-time communication with Socket.IO, and Stripe payment integration. Built two complete web applications — a multi-role school management system and a live event booking platform — both deployed on cloud infrastructure.

PROFESSIONAL EXPERIENCE

MERN Stack Developer — Intern | **U Dev** | *Oct 2025 – Feb 2026*

- Completed an intensive full-stack training program focused on the MERN ecosystem and modern web development practices
- Built and deployed two complete web applications independently during the program on cloud infrastructure
- Applied JWT authentication, REST API design, and role-based access control in real project scenarios
- Delivered an All-in-One School Management System as the capstone project — detailed under Projects

PROJECTS

Event Nest — Event Booking Platform | *2025*

Tech Stack: *MongoDB · Express.js · React.js · Node.js · Stripe · Socket.IO · JWT*

- Built a full-featured event booking platform with live seat availability tracking and dynamic pricing logic
- Integrated Stripe payment gateway for secure end-to-end checkout flow for event attendees
- Implemented real-time messaging between organizers and attendees using Socket.IO
- Designed a JWT-secured login system with a dedicated admin panel for full event lifecycle management

  Live: event-nest-system.vercel.app

All-in-One School Management System | *Oct 2025 – Feb 2026*

Tech Stack: *MongoDB · Express.js · React.js · Node.js · JWT*

- Developed a multi-role web platform with separate dashboards and permission levels for Principal (super-admin) and Assistant
- Built 8 core modules: student & teacher attendance, fee management, salary tracking, stationery records, academic planning, expense management, and student progress/test records
- Implemented class-wise student enrollment, automatic roll number assignment, promotion management, and individual student profiles with complete academic history
- Designed RESTful APIs backed by MongoDB for all institutional data — fees, salaries, expenses, attendance, and exam results
- Delivered a responsive admin interface enabling paperless day-to-day school operations for small to medium-sized institutions

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, RESTful API Design, Socket.IO, MVC Architecture

Database: MongoDB, Mongoose ODM

Tools & Practices: Git, GitHub, JWT Authentication, Stripe Integration, CRUD Operations, Postman, VS Code

EDUCATION

BS Information Technology | University of Education, Lahore | *2021 – 2025*
